

## 2019 Equipment Inspection Q & A

### Water Handling

#### Fuel Containers:

Does a Dolmar (*dual container for chainsaw fuel and bar oil*) meet the agreement requirement to hold chainsaw fuel and guide bar oil? **YES**

#### License Plates:

Vehicles with farm plates, expired plates or the license plates that do not match what is listed in VIPR are acceptable. As a reminder to vendors, when the vehicle arrives at an incident, it must then be properly licensed and meet all DOT and FMCSA regulations.

#### Water Tender Pumps:

Are they required to pass a pump pressure test? **NO**

Are they required to demonstrate drafting capability? **NO**

#### Brakes on All Axles:

Does the requirement for brakes on all axles apply to a lift axle? **YES**

#### Water Tender Spare Tire:

Is a spare tire required for a water tender? **NO**

### Heavy Equipment with Water:

If a piece of equipment (*example; skidder*) completed a pre award inspection last year under the Misc. Heavy Equipment agreement and the same piece of equipment (*with a the addition of a tank*) is also being utilized under the Heavy Equipment with Water agreement, does the equipment need to be reinspected this year?

**YES. The reason is to insure the machine has not been modified to exceed the original design limitations and the mounting hardware for the tank meets the agreement requirements.**

### Refrigerated Trailer

#### Temperature:

At pre-award inspection, does the trailer need to be at the temperature requirements in the agreement? **NO**
